## Official statement

The Whale Protection Foundation is shocked by the largest and cynical genocide against marine mammals in modern history – the killing of dolphins in the Faroe Islands (Denmark) on September 12 this year.

"Civilized" Danes aged from 12 to 60 years drove into the fjord and recklessly slaughtered 1,428 white-sided dolphins

The Faroes are small islands that are part of the Danish Crown, ignore the whole world, continue to damage nature and brutally kill marine mammals that have, as proven by science, developed intelligence and their own peculiar culture.

For several decades in the media, and now in social networks, shocking videos and photos of the "Grindadrap" appear annually-allegedly the traditional hunting season for pilot whales, and other dolphin species . The North Sea turns Red on them, hundreds of dead, decapitated dolphins lie on the shore in even rows, and people with long cleavers continue to cut the bodies that are struggling in agony.

We believe that this should be put to an end, and right now. The Kingdom of Denmark, which includes the Faroe Islands, the Faroese Parliament, Danish and Faroese companies should feel that it is impossible to continue killing intelligent beings, to disrupt the balance of life in the world's oceans!

And, oddly enough, it is in our power to make them feel it!

We urge all Russians, citizens of other countries to remember the bloody waters of the Faroe fjords, and think a few more times before buying the usual goods produced by companies of the Danish Kingdom, by the way, quite popular in Russia, there are the same goods from other countries that do not kill dolphins and whales. We can do without Danish beer and Faroese salmon, cruises to Denmark and the Faroes.

Here are the Danish brands whose products should be ignored for the sake of ending the annual Faroese massacre:

LEGO	Samsøe & Samsøe	Moss Copenhagen
Pandora	Only	Mads Nørgaard - Copenhagen
Carlsberg	Woden	
Tuborg	B.Young	
Vero Moda	Minimum	
ECCO	ICHI
